

The FAA Safety Team presents:

Children of the Magenta!

Do you use electronic flight instruments? Perhaps a GPS, autopilot, multifunction display or flight management system? If so, you may be one of the Children of the Magenta! Automation is the allocation of functions to machines that would otherwise be allocated to humans. The term is also used to refer to the machines which perform those functions. Flight deck automation, therefore, consists of machines on the aircraft flight deck which perform functions otherwise performed by pilots. Nevertheless, with the advent of advanced technology, so called "glass cockpit" aircraft have transferred safety-critical functions away from human control! Accident and incident statistics indicate that pilots have lost some of their basic flying skills! Attend this informative briefing and learn when to quit following that Magenta Line!

Directions: RT 3 to exit 6b Carver Rd, LT on Montgomery Dr, RT on S. Meadow Rd to Gate 3 Alpha 1 Flight.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
